CSE 2321: Foundations I: Discrete Structures

Course Description

Propositional and first-order logic; basic proof techniques; graphs, trees; analysis of algorithms; asymptotic analysis; recurrence relations.

Transcript Abbreviation: Fndns 1: Discr Str

Grading Plan: Letter Grade Course Deliveries: Classroom Course Levels: Undergrad Student Ranks: Sophomore

Course Offerings: Autumn, Spring Flex Scheduled Course: Never Course Frequency: Every Year

Course Length: 14 Week

Credits: 3.0 **Repeatable:** No

Time Distribution: 3.0 hr Lec

Expected out-of-class hours per week: 6.0

Graded Component: Lecture Credit by Examination: No Admission Condition: No Off Campus: Never

Campus Locations: Columbus, Lima

Prerequisites and Co-requisites: Prereq: 2122 (230), 2123 (214), or 2221 (222); and Math 1151 (152), or

1161. Concur (for students with credit for 2221): 2231. **Exclusions:** Not open to students with credit for 625 or 680.

Cross-Listings:

Course Rationale: Existing course.

The course is required for this unit's degrees, majors, and/or minors: Yes

The course is a GEC: No

The course is an elective (for this or other units) or is a service course for other units: Yes

Subject/CIP Code: 14.0901

Subsidy Level: Baccalaureate Course

Programs

Abbreviation	Description				
BS CSE	BS Computer Science and Engineering				

Course Goals

Be competent with using propositional logic			
Be familiar with first-order predicate logic			
Be familiar with proving by contradiction, by ordinary induction and by strong induction			
Be familiar with using asymptotic notation			
Be familiar with analyzing running time of simple iterative algorithms			
Be familiar with graph theory			

Be exposed to analyzing running time of recursive algorithms					
Be exposed to sorting and searching					
Be exposed to designing graph algorithms					

Course Topics

Topic	Lec	Rec	Lab	Cli	IS	Sem	FE	Wor
Mathematical reasoning	12.0							
Analysis of simple algorithms	6.0							
Sorting and searching	9.0							
Graph theory	9.0							
Graph algorithms	6.0							

Grades

Aspect	Percent
Homework	20%
Classroom participation	10%
Midterms, final	70%

Representative Textbooks and Other Course Materials

Title	Author
Discrete Mathematics and its Applications	Kenneth H. Rosen

ABET-EAC Criterion 3 Outcomes

Course Contribution		College Outcome
***	a	An ability to apply knowledge of mathematics, science, and engineering.
	b	An ability to design and conduct experiments, as well as to analyze and interpret data.
**	c	An ability to design a system, component, or process to meet desired needs.
	d	An ability to function on multi-disciplinary teams.
*	e	An ability to identify, formulate, and solve engineering problems.
	f	An understanding of professional and ethical responsibility.
	g	An ability to communicate effectively.
	h	The broad education necessary to understand the impact of engineering solutions in a global and societal context.
*	i	A recognition of the need for, and an ability to engage in life-long learning.
	j	A knowledge of contemporary issues.
**	k	An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

BS CSE Program Outcomes

Course Contribution		Program Outcome
***	a	an ability to apply knowledge of computing, mathematics including discrete mathematics as well as probability and statistics, science, and engineering;

Course Contribution		Program Outcome
	b	an ability to design and conduct experiments, as well as to analyze and interpret data;
**	С	an ability to design, implement, and evaluate a software or a software/hardware system, component, or process to meet desired needs within realistic constraints such as memory, runtime efficiency, as well as appropriate constraints related to economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability considerations;
	d	an ability to function on multi-disciplinary teams;
*	e	an ability to identify, formulate, and solve engineering problems;
	f	an understanding of professional, ethical, legal, security and social issues and responsibilities;
	g	an ability to communicate effectively with a range of audiences;
	h	an ability to analyze the local and global impact of computing on individuals, organizations, and society;
*	i	a recognition of the need for, and an ability to engage in life-long learning and continuing professional development;
	j	a knowledge of contemporary issues;
**	k	an ability to use the techniques, skills, and modern engineering tools necessary for practice as a CSE professional;
**	1	an ability to analyze a problem, and identify and define the computing requirements appropriate to its solution;
**	m	an ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices;
	n	an ability to apply design and development principles in the construction of software systems of varying complexity.
