

CSE 5889 (Approved): Intermediate Studies in Multidisciplinary Computing

Course Description

Intermediate-level topics in multidisciplinary computing techniques

Prior Course Number: 788

Transcript Abbreviation: Interm: Multidispl

Grading Plan: Letter Grade

Course Deliveries: Classroom

Course Levels: Undergrad, Graduate

Student Ranks: Senior, Masters, Doctoral

Course Offerings: Autumn, Spring

Flex Scheduled Course: Never

Course Frequency: Every Year

Course Length: 14 Week

Credits: 2.0

Repeatable: Yes

Maximum Repeatable Credits: 8.0

Total Completions Allowed: 4

Allow Multiple Enrollments in Term: Yes

Time Distribution: 2.0 hr Lec

Expected out-of-class hours per week: 4.0

Graded Component: Lecture

Credit by Examination: No

Admission Condition: No

Off Campus: Never

Campus Locations: Columbus

Prerequisites and Co-requisites: Prereq: permission of instructor or grad standing

Exclusions:

Cross-Listings:

Course Rationale: Mirrors existing 2-credit special topics courses in various CSE disciplines, eg 5239, 5329, 5429, 5449, 5479, etc.

The course is required for this unit's degrees, majors, and/or minors: No

The course is a GEC: No

The course is an elective (for this or other units) or is a service course for other units: Yes

Subject/CIP Code: 14.0901

Subsidy Level: Doctoral Course

Programs

Abbreviation	Description
BS CSE	BS Computer Science and Engineering
MS CSE	MS Computer Science and Engineering
PhD CSE	PhD Computer Science and Engineering

General Information

Details vary from term to term; check with department for specifics about current offerings.

Course Topics

Topic	Lec	Rec	Lab	Cli	IS	Sem	FE	Wor
Current topics in multidisciplinary computing techniques	25.0							

ABET-EAC Criterion 3 Outcomes

Course Contribution	College Outcome
a	An ability to apply knowledge of mathematics, science, and engineering.
b	An ability to design and conduct experiments, as well as to analyze and interpret data.
c	An ability to design a system, component, or process to meet desired needs.
d	An ability to function on multi-disciplinary teams.
e	An ability to identify, formulate, and solve engineering problems.
f	An understanding of professional and ethical responsibility.
g	An ability to communicate effectively.
h	The broad education necessary to understand the impact of engineering solutions in a global and societal context.
i	A recognition of the need for, and an ability to engage in life-long learning.
j	A knowledge of contemporary issues.
k	An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

BS CSE Program Outcomes

Course Contribution	Program Outcome
a	an ability to apply knowledge of computing, mathematics including discrete mathematics as well as probability and statistics, science, and engineering;
b	an ability to design and conduct experiments, as well as to analyze and interpret data;
c	an ability to design, implement, and evaluate a software or a software/hardware system, component, or process to meet desired needs within realistic constraints such as memory, runtime efficiency, as well as appropriate constraints related to economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability considerations;
d	an ability to function on multi-disciplinary teams;
e	an ability to identify, formulate, and solve engineering problems;
f	an understanding of professional, ethical, legal, security and social issues and responsibilities;
g	an ability to communicate effectively with a range of audiences;
h	an ability to analyze the local and global impact of computing on individuals, organizations, and society;
i	a recognition of the need for, and an ability to engage in life-long learning and continuing professional development;
j	a knowledge of contemporary issues;
k	an ability to use the techniques, skills, and modern engineering tools necessary for practice as a CSE professional;
l	an ability to analyze a problem, and identify and define the computing requirements appropriate to its solution;

Course Contribution		Program Outcome
	m	an ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the tradeoffs involved in design choices;
	n	an ability to apply design and development principles in the construction of software systems of varying complexity.
